

Slips, Trips and Falls

Safety tips:

- Keep the floor clear. Remember to keep hoses and electrical cords out of walkways.
- Keep the floor clean. Clean up grease, water and other liquids immediately.
- Install non-skid mats in walkways and handrails in stairways.
- Climbing and reaching high places will increase your chance of falling. Use appropriate gear for tasks in these cases. For instance, use a sturdy step stool with hand rails when climbing and reaching high places is required.
- Use floor treatments where continual problems exist.
- Barricade the perimeter of areas being cleaned to prevent others from slipping.
